CRM System

Product Requirements Document — MVP Screen & Feature Specification

Version 1.0 | June 2025 | Confidential

Document Purpose	Defines every screen, feature, and user interaction for the CRM MVP — structured by role and presented in a developer-ready format.
How to Read	Rows are grouped first by Role (dark blue header), then by Module (light blue sub-header). Each row is one screen or feature. Columns describe the story, requirements, expected outcomes, and failure states.
Roles Covered	Super Admin / MD / GM / Head of Ops · Sales Closer / Relationship Manager · Inspection Officer · Admin / Documentation Officer
MVP Scope	User Management · Lead Management · Pipeline Tracking · Conversation Logs · Follow-Up Reminders · Inspection Management · Dashboards · Basic Reporting · Notifications

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
ROLE: Super Admin / MD / General Manager / Head of Operations						
Module: Authentication						
Login	Email & Password Login	<i>As a management user, I want to log in with my email and password so I can access my dashboard securely.</i>	- User has an active account with a management-level role. - User is on the Login screen.	- The screen must display the Beacon Corporate Realty logo, an email input field, a password input field with show/hide toggle, a Log In button, and a 'Forgot Password?' link. - On submit, the system must validate that both fields are non-empty; if either is empty, display an inline error: 'This field is required.' - On valid credentials, the system must authenticate the user and redirect them to their role-specific dashboard. - On invalid credentials, the system must display: 'Incorrect email or password. Please try again.' The form must not clear the email field. - After 5 consecutive failed attempts, the system must lock the account for 15 minutes and display: 'Your account has been temporarily locked. Try again in 15 minutes.'	- User is authenticated and lands on the Management Dashboard. - Login attempt is logged with timestamp and IP address.	- Account is inactive or deactivated → display: 'Your account is inactive. Please contact your administrator.' - Network error on submit → display: 'Unable to connect. Please check your connection and try again.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
Login	Forgot Password / Reset Password	<i>As a management user, I want to reset my password via email so I can regain access if I forget my credentials.</i>	- User is on the Login screen. - User clicks 'Forgot Password?'	- The screen must display an email input field and a 'Send Reset Link' button. - On submit with a valid registered email, the system must send a password reset link and display: 'A reset link has been sent to your email.' - The reset link must expire after 60 minutes. - Clicking the link must present a 'New Password' field, a 'Confirm Password' field, and a 'Set New Password' button. - The new password must be at least 8 characters. If the fields do not match, display: 'Passwords do not match.' - On successful reset, the system must redirect the user to the Login screen and display: 'Password updated successfully. Please log in.'	- Password is updated in the system. - Old password is immediately invalidated. - Action is logged.	- Email not found in system → display: 'If this email exists, a reset link has been sent.' (do not confirm or deny account existence). - Reset link already used or expired → display: 'This link is invalid or has expired. Please request a new one.'
Module: Management Dashboard						
Dashboard	Platform-Wide Summary & Live Alert Feed	<i>As a management user, I want to see a real-time summary of all sales activity so I can monitor pipeline health, team performance,</i>	User is authenticated with a management role (Super Admin, GM,	The dashboard must display summary stat cards: Total Leads (all time), New Leads Today, Unassigned Leads (shown in red if count > 0), Untouched	Dashboard renders with live data. Card navigation applies correct filters.	Data service unavailable → display last cached values with a 'Data may be outdated' banner and a manual Refresh

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
		<i>and flag issues at a glance.</i>	Head of Ops). User has been redirected to the Management Dashboard after login.	Leads (leads with zero activity logs), Follow-Ups Due Today, Missed Follow-Ups (overdue), Inspections Scheduled This Week, Inspections Completed This Month, Sales Closed This Month, Revenue Generated This Month. - Each stat card must be clickable and must navigate to the relevant filtered list (e.g. clicking 'Missed Follow-Ups' opens the Follow-Up Queue filtered to overdue items). - The dashboard must display a pipeline stage distribution chart showing how many leads are at each of the 14 stages. - The dashboard must display a lead source breakdown chart (pie or bar) showing volume by source (Paid Ads, Referral, Walk-in, etc.). - The dashboard must display a top 5 closers table showing each closer's name and number of leads converted this month. - The dashboard must display a live alerts panel listing: leads with no assigned owner, leads with no next	Alert feed is current.	button. Do not block the page. - Alert feed fails to load → display the alerts panel in a degraded state with a warning notice; do not affect the rest of the dashboard. - No data for selected filter period → display empty state per card/chart with: 'No data for this period.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				action set, leads with no follow-up date, follow-ups overdue by more than 24 hours, new leads not contacted within the configured threshold. • Each alert item must be clickable and must navigate to the flagged lead record. • The dashboard must display a recent activity feed showing the last 10 actions logged across all staff (who did what, on which lead, at what time). • The dashboard must support date range filtering: Today, This Week, This Month, Last Month, Custom Range. Stat cards and charts must update on filter change. • Management must be able to filter the entire dashboard by an individual staff member to view that person's performance in isolation. • The dashboard must auto-refresh data without a full page reload.		
Module: User Management						
User Management	View All System Users	As a Super Admin or GM, I want to	• User is authenticated	• The screen must display all users in a	• User list is displayed	• No users match filters → display: 'No

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
		<i>view a directory of all CRM users so I can manage access and see who is active on the system.</i>	as Super Admin or General Manager. User navigates to Users in the sidebar.	paginated, searchable table with columns: Full Name, Email, Phone, Role, Status (Active / Inactive), Date Added. - The user must be able to search by name or email. - The user must be able to filter by Role and by Status. - Each row must display an Edit button and an action to Deactivate or Reactivate. - Clicking a row must open that user's profile/edit screen.	accurately and reflects current system state.	users found for the selected filters.' Data fetch fails → display retry option; preserve the last loaded page.
User Management	Create New User	<i>As a Super Admin, I want to add a new staff member to the CRM so they can log in and be assigned leads.</i>	- User is authenticated as Super Admin. - User clicks 'Add New User' from the User List screen.	- The form must include: Full Name (required), Email Address (required, must be unique in the system), Phone Number, Role selector (Super Admin / GM / Head of Ops / Sales Closer / Relationship Manager / Inspection Officer / Admin-Doc Officer), Status toggle (Active / Inactive, defaults to Active). - On save, the system must validate that Full Name, Email, and Role are provided. If any are missing, display an inline error next to the relevant field.	- New user account is created. - Welcome/set-password email is sent. - User appears in the list with status Active.	- Email already exists in the system → display: 'An account with this email already exists.' - Email delivery fails → create the account and notify the admin: 'User created but the welcome email could not be sent. Please share login instructions manually.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				- The system must send a welcome email to the new user's address with a link to set their password. - The new user must appear immediately in the User List.		
User Management	Edit User & Reset Password	<i>As a Super Admin, I want to update a staff member's details or reset their password so I can correct errors and maintain account security.</i>	- User is authenticated as Super Admin. - User has selected an existing user to edit.	- The edit form must pre-fill all current user details. - The admin must be able to update Full Name, Phone, Role, and Status. - Email address must not be editable after account creation. - The admin must be able to click 'Send Password Reset Link' to trigger a reset email to the user. - The admin must be able to Deactivate or Reactivate the user via a status toggle. Deactivating a user must immediately revoke their active session. - On save, changes must be reflected immediately in the User List.	User record is updated. If deactivated, active session is revoked immediately. All changes are logged.	- Attempting to deactivate the last remaining Super Admin → block and display: 'You cannot deactivate the only Super Admin account.' - Save with no changes → allow save without error; nothing is written to the audit log.
User Management	Delete User & Reassign Leads	<i>As a Super Admin, I want to permanently delete a user account while</i>	User is authenticated as Super Admin.	The Delete User option must be available only to Super Admins and	User account is permanently deleted. All previously	Attempting to delete own account → block and display:

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
		<i>ensuring their leads are safely reassigned so no lead becomes ownerless.</i>	- User is on the Edit User screen. - The user being deleted has leads assigned to them.	must be separate from the deactivate action. - On clicking Delete, if the user has leads assigned, the system must display a modal: 'This user has [N] leads assigned. Please reassign them before deleting the account.' The modal must show a closer selector to reassign all leads in bulk. - If the user has zero assigned leads, the system must display a simple confirmation: 'Are you sure you want to permanently delete this account? This cannot be undone.' - Deletion must only proceed after confirmation or after leads have been reassigned and confirmed. - The deleted user must be removed from all dropdown lists (e.g. 'Assign to') across the system.	assigned leads now show the new owner. Action is logged.	'You cannot delete your own account.' Attempting to delete last Super Admin → block with: 'You cannot delete the only Super Admin account.'
Module: Lead Management						
Lead Management	View Lead List	<i>As a management user, I want to view all leads in the system with key details so I can monitor the overall</i>	User is authenticated with a management role.	The screen must display all leads in a paginated, searchable table with columns: Lead Name, Phone Number, Lead Source,	Lead list renders accurately. Filters, search, bulk actions, and	CSV import contains rows with missing required fields → skip those rows, import valid rows, and show a

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
		<i>pipeline and identify problem areas.</i>	User navigates to Leads in the sidebar.	Category, Pipeline Stage, Temperature (colour-coded badge: Hot = red, Warm = orange, Cold = blue), Assigned Closer, Follow-Up Date, Last Activity Date. - Leads with an overdue follow-up date must show a red flag icon in the Follow-Up Date column. - Leads with no activity for 7+ days must show a 'Dormant' badge. - Leads with no assigned owner must show an 'Unassigned' warning badge. - The user must be able to search by lead name or phone number. - The user must be able to filter by: Pipeline Stage, Lead Source, Lead Category, Temperature, Assigned Staff Member, and Date Range (date lead was created). - The user must be able to select multiple leads using a checkbox and perform bulk actions: Bulk Assign (reassign all selected leads to a chosen closer) and Bulk Update Stage. - The user must be able to export the current filtered list as CSV.	export function correctly.	summary: 'X leads imported. Y rows skipped due to missing required fields.' - No leads match current filters → display: 'No leads found. Try adjusting your filters.' - Export fails → display error with retry.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				- The user must be able to import leads via CSV file upload. The system must validate the file format before processing and report rows that fail validation. - Clicking a lead row must open the Lead Profile screen.		
Lead Management	Create New Lead	<i>As a management user, I want to add a new lead to the CRM so it is captured centrally with all required information from the start.</i>	- User is authenticated with a management role. - User clicks 'Add New Lead'.	The form must include: Full Name (required), Phone Number (required), WhatsApp Number (auto-fills from phone; editable), Email Address, Location/Area, Lead Source (required dropdown: Paid Ads, Facebook, Instagram, Google, TikTok, Referral, Field Marketing, Webinar, Waitlist, Cold Calling, Walk-in, Existing Client), Budget Range, Property Interest, Assigned Closer (required — dropdown of active closers), Lead Category (required dropdown: Incoming, Active, Inspection, Investor, Revival, Reserved, Market, Untapped Wealth), Lead Temperature (required: Hot / Warm / Cold), Pipeline Stage (required dropdown,	Lead is created and appears in the Lead List. Assigned closer is notified of the new lead assignment.	- Duplicate phone number detected (same number already exists on another lead) → display a warning: 'A lead with this phone number already exists: [Lead Name]. Do you want to continue or view the existing lead?' Allow the user to proceed or cancel. - Session timeout before save → display: 'Your session has expired. Please log in again.' Form data should be preserved where possible using local session state.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				defaults to 'New Lead'), Next Action (required free text), Follow-Up Date and Time (required). - The system must block saving if any required field is empty and display an inline error next to each missing field. - On successful save, the lead must appear immediately in the Lead List and be visible to the assigned closer. - The system must display a 'Save & Log Activity' option that saves the lead and immediately opens the Log Activity modal pre-linked to this lead.		
Lead Management	View Lead Profile	<i>As a management user, I want to view a lead's complete profile and full conversation history so I can understand where the relationship stands and take action.</i>	- User is authenticated with a management role. - User has clicked a lead from the Lead List or Pipeline Board.	- The top section must display: Lead Name, Phone, WhatsApp, Email, Location, Budget, Property Interest, Temperature badge, Lead Source, Lead Category, Assigned Closer, Assigned Relationship Manager, Date Created, Last Activity Date. - A 'Dormant' banner must appear prominently if the lead has had no activity for 7 or more days.	Lead profile renders completely. All history is visible. Any action taken from this screen is saved and logged.	- Activity log is empty → display: 'No activity has been logged for this lead yet.' - Profile fails to load → display retry; do not show a blank screen. - Attempting to reassign a lead that is currently mid-inspection → display a warning: 'This lead has an active inspection scheduled. Are you sure you want to

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				• The next action and follow-up date must be displayed prominently near the top of the profile, not buried at the bottom. • A visual pipeline progress bar must display all 14 stages, with the lead's current stage highlighted. • The Activity / Conversation Log section must display a chronological timeline of all logged interactions. Each entry must show: Date and time, Activity type (Call, WhatsApp, SMS, Email, Voice Note, Meeting, Internal Note), Summary, Objections raised, Client feedback, Next step noted at the time, Logged by (staff name). • The profile must display all past follow-up records including whether each was completed on time, completed late, or missed. • The profile must display any linked inspection records with their status. • Management must be able to see the full profile of any lead. They must also be able		reassign it?' Require confirmation before proceeding.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				to Reassign the lead to a different closer from this screen.		
Lead Management	Edit Lead Information	<i>As a management user, I want to update a lead's details so the record stays accurate as the relationship evolves.</i>	- User is authenticated with a management role. - User is on the Lead Profile screen and clicks Edit.	- The edit form must pre-fill all existing lead fields. - All fields that were required on creation remain required on edit. - The system must block saving if any required field is cleared and display inline errors. - On save, changes must be reflected immediately in the Lead Profile and Lead List. - A system note must be automatically added to the Activity Log: 'Lead details updated by [user name] on [date/time].' listing the fields that changed.	Lead record is updated. Change is automatically logged in the activity timeline.	- User attempts to remove the assigned closer without selecting a replacement → block and display: 'A lead must have an assigned owner. Please select a closer before saving.' - User attempts to clear the pipeline stage → block and display: 'Pipeline stage is required.'
Lead Management	Log Activity / Conversation	<i>As a management user, I want to log an interaction against a lead so the full conversation history is available to any team member who picks up this lead.</i>	- User is on the Lead Profile screen. - User clicks 'Log Activity'.	The log activity modal or screen must include: Activity Type selector (Call, WhatsApp, SMS, Email, Voice Note, Meeting, Internal Note — required), Date and Time (defaults to current time; editable), Conversation Summary (required free text), Objections Raised (free text), Client Feedback (free text), Outcome	Activity is saved and visible in the lead's timeline. Last activity date is updated. Follow-up date and stage are updated if the user selected those options.	- Modal is closed without saving → display: 'You have unsaved changes. Are you sure you want to discard them?' - Save fails due to a network error → display: 'Your activity could not be saved. Please try again.' Preserve the form content.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				(free text), Next Step (required free text), optional checkbox to update the follow-up date with a date/time picker, optional checkbox to update the pipeline stage with a stage dropdown. - The system must block saving if Activity Type, Summary, or Next Step are empty. - On save, the activity must appear immediately at the top of the Lead's Activity Log. - The lead's 'Last Activity Date' must be updated to the current timestamp. - If the user updates the pipeline stage via this modal, the stage change must also be recorded as a separate log entry: 'Stage updated from [X] to [Y] by [user name].'		
Lead Management	Archive Lead	<i>As a management user, I want to archive a lead that is no longer active so it is removed from the main working views without being permanently deleted.</i>	- User is authenticated with a management role. - User is on the Lead Profile screen.	- The Archive option must be accessible from the Lead Profile screen. - On clicking Archive, the system must display a confirmation: 'Are you sure you want to archive this lead? It will be removed from active	Lead is archived and no longer appears in active views. Archive action is logged.	Attempting to archive a lead with an active (Scheduled or Confirmed) inspection → block and display: 'This lead has an upcoming inspection. Please cancel or complete

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				views but can be restored at any time.' - Archived leads must be excluded from the default Lead List, Pipeline Board, and Follow-Up Queue. - Management must be able to view archived leads by applying an 'Archived' filter on the Lead List. - From the archived view, management must be able to Restore a lead, which returns it to active status with its last pipeline stage and follow-up date intact.		the inspection before archiving.' Restoring a lead whose assigned closer has been deactivated → restore the lead but flag it as Unassigned and send an alert to management.
Module: Follow-Up & Reminder Management						
Follow-Up Management	View Follow-Up Queue	<i>As a management user, I want to see all follow-ups that are due or overdue across the entire team so I can monitor closer responsiveness and intervene where needed.</i>	- User is authenticated with a management role. - User navigates to Follow-Ups in the sidebar.	- The screen must display two clearly labelled sections: 'Due Today' and 'Overdue'. - The Overdue section must be displayed first and visually emphasised (e.g. red header). - Each row must show: Lead Name, Phone Number, Pipeline Stage, Assigned Closer, Last Activity Summary (truncated), Days Overdue (for overdue items), and Follow-Up Date.	Follow-up queue renders accurately. Reassign action is applied immediately and logged.	- Queue is empty → display: 'No follow-ups due or overdue at this time.' - Reassign without selecting a new closer → block and display: 'Please select a closer to reassign this follow-up to.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				- Management must be able to filter the queue by: Staff Member, Follow-Up Type (New Lead, Interested Lead, Inspection Prospect, Payment Follow-Up, Revival Lead), and Date Range. - Management must be able to click any row to open the Lead Profile. - Management must be able to Reassign a follow-up to a different closer directly from this screen without opening the full lead profile. - The screen must display a count summary at the top: 'X follow-ups due today. Y overdue across Z closers.'		
Module: Inspection Management						
Inspection Management	View Inspection List	<i>As a management user, I want to view all inspection records across all estates and staff so I can monitor booking rates, confirmation rates, and no-show patterns.</i>	- User is authenticated with a management role. - User navigates to Inspections in the sidebar.	- The screen must display all inspections in a paginated table with columns: Lead Name, Estate/Project, Inspection Date, Time, Meeting Point, Assigned Closer, Inspection Officer, Status. - Status must be colour-coded: Scheduled (blue), Confirmed (green), Completed (dark green), No-Show	Inspection list renders accurately. Calendar and list views function correctly.	- No inspections match filters → display: 'No inspections found for the selected filters.' - Calendar view fails to load → fall back to list view and display: 'Calendar view is currently unavailable. Showing list view.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				(red), Rescheduled (orange), Cancelled (grey). - Management must be able to filter by: Status, Date Range, Estate/Project, Assigned Closer, Inspection Officer. - Management must be able to toggle between a list view and a calendar view. The calendar view must display inspections as events on their scheduled dates. - Clicking a row must open the Inspection Record screen. - Management must be able to export the filtered inspection list as CSV.		
Inspection Management	Create New Inspection	<i>As a management user, I want to schedule a new inspection for a lead so it is formally tracked in the system.</i>	- User is authenticated with a management role. - User clicks 'Schedule New Inspection' from the Inspection List or from a Lead Profile.	The form must include: Lead selector (search and select from existing leads — required), Estate/Project (required dropdown), Date (required), Time (required), Meeting Point/Instructions (required free text), Assigned Sales Closer (required — auto-fills from the linked lead; editable), Assigned Inspection Officer (required dropdown of inspection officers),	Inspection is created and visible in the Inspection List. Lead stage is updated. Both assigned staff are notified.	- Selected lead already has an active inspection with status Scheduled or Confirmed → display a warning: 'This lead already has an upcoming inspection on [date]. Do you want to create another?' Require confirmation. - Inspection officer is not available on the selected date (if calendar availability

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				Status (required — defaults to 'Scheduled'), Internal Notes. - The system must block saving if any required field is empty. - On save, the lead's pipeline stage must be automatically updated to 'Inspection Booked' if it was previously at a lower stage. - On save, the assigned closer and inspection officer must each receive a notification with the inspection details. - If the form was opened from a Lead Profile, the Lead selector must be pre-filled and locked.		is tracked) → display a warning. Do not block saving.
Inspection Management	View & Update Inspection Record	<i>As a management user, I want to view the full detail of an inspection and update its status so the record accurately reflects what happened.</i>	- User is authenticated with a management role. - User has clicked an inspection from the Inspection List.	- The record must display all booking details: Lead name (linked to Lead Profile), Estate, Date, Time, Meeting Point, Assigned Closer, Inspection Officer, Status, Internal Notes, Created by, Created date. - Management must be able to update the Status to any value: Scheduled, Confirmed, Completed, No-Show, Rescheduled, Cancelled.	Status update is saved and reflected in the Inspection List. Lead stage is updated where applicable. All changes are logged.	- Updating status to Completed without an inspection report having been submitted → display a warning: 'No inspection report has been submitted. Are you sure you want to mark this as Completed?' Require confirmation. - Rescheduling without providing a new date/time → block and display: 'A new date and time

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				- If status is updated to Completed, the system must prompt management to confirm the pipeline stage update to 'Inspection Completed' on the linked lead. - If status is updated to Rescheduled, the system must require a new Date, Time, and Reason, and must log the previous date as a rescheduling history entry. - The record must display any inspection report and photos/videos uploaded by the inspection officer. - Management must be able to navigate directly to the linked Lead Profile from this screen.		are required to reschedule.'
Module: Pipeline Tracker						
Pipeline	View Pipeline Board	<i>As a management user, I want to see all leads arranged by pipeline stage on a kanban-style board so I can quickly identify where leads are clustered and spot bottlenecks.</i>	- User is authenticated with a management role. - User navigates to Pipeline in the sidebar.	The board must display one column per pipeline stage in the following order: New Lead, Contact Attempted, Conversation Started, Qualified Prospect, Inspection Booked, Inspection Completed, Negotiation, Reservation, Payment, Allocation,	Board renders accurately. Drag-and-drop stage changes are saved and logged. Filters update the board in real time.	- Drag-and-drop fails due to a connection error → revert the card to its original column and display: 'Stage could not be updated. Please try again.' - Board has a very large number of leads → implement horizontal scrolling for columns and

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				Documentation, Client/Investor, Referral, Repeat Purchase. • Each column header must display the stage name and the count of leads currently in that stage. • Each lead card must display: Lead Name, Phone Number, Temperature badge (colour-coded), Assigned Closer initials, Follow-Up Date. Overdue follow-ups must be highlighted on the card. • Management must be able to drag and drop a lead card to move it to a different stage. On drop, the system must automatically log a stage-change activity entry on the lead: 'Stage updated from [X] to [Y] by [user name] on [date/time].' • Management must be able to click a lead card to open the Lead Profile. • Management must be able to filter the board by: Assigned Closer, Estate/Project, Temperature, Date Range. • Management must be able to switch between		lazy-load cards within each column to maintain performance.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				Board View and List View.		
Module: Reports						
Reports	Generate & View Performance Reports	<i>As a management user, I want to generate detailed sales and team performance reports so I can make data-driven decisions and present accurate numbers to leadership.</i>	- User is authenticated with a management role. - User navigates to Reports in the sidebar.	- The screen must provide a report type selector with the following options: Lead Summary Report, Pipeline Movement Report, Follow-Up Performance Report, Inspection Report, Conversion Report, Team Performance Report. - For all report types, management must be able to apply filters: Date Range (Today, This Week, This Month, Last Month, Custom), Staff Member, Estate/Project, Lead Source, Pipeline Stage. - Lead Summary Report must show: Total Leads, New Leads, Unassigned Leads, Untouched Leads, Dormant Leads, broken down by source and category. - Pipeline Movement Report must show: how many leads entered each stage, how many exited each stage, and average time spent in each stage during the period.	Reports render accurately for the selected type and filters. Export and schedule functions work correctly.	- Report generation takes more than 10 seconds → display a loading indicator and generate the report asynchronously; notify the user when it is ready. - No data for the selected filters → display: 'No data available for the selected period and filters.' - Scheduled report email delivery fails → retry up to 3 times and notify management via in-app alert if all attempts fail.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				• Follow-Up Performance Report must show per closer: total follow-ups due, completed on time, completed late, missed, snoozed. • Inspection Report must show: total inspections scheduled, confirmed, completed, no-shows, and cancellations — broken down by estate and inspection officer. • Conversion Report must show: leads converted to sales by closer, by source, and by estate. • Team Performance Report must show per closer: total leads assigned, activity logs submitted (calls, WhatsApp, meetings), follow-up completion rate, inspections booked, sales closed. • Management must be able to export any report as PDF or Excel. • Management must be able to schedule a report to be automatically emailed on a weekly or monthly basis, with recipient email addresses configurable.		
Module: Alerts & Notifications						

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
Notifications	View & Manage Notifications	<i>As a management user, I want to receive and manage system alerts so I am immediately aware of rule violations, missed follow-ups, and team performance issues.</i>	- User is authenticated with a management role. - The notification bell icon is visible in the top navigation bar on all screens.	- The bell icon must display an unread count badge when there are unread notifications. - Clicking the bell must open a notifications panel listing all notifications for this user, sorted by most recent. - Each notification must show: notification type, message text, timestamp, and a link to the relevant record. - Management-specific notification types must include: New lead unassigned for more than the configured threshold, Closer has not contacted a new lead within 24 hours, Missed follow-up (any closer), Lead dormant for 7+ days, Lead has no next action, Lead has no follow-up date, Inspection not confirmed 24 hours before scheduled time, New inspection report submitted, Stage change on any lead. - Clicking a notification must navigate to the relevant lead, inspection, or record and mark the notification as read.	Notifications are delivered in real time. Click navigation opens the correct record. Read/dismiss actions are applied immediately.	- Notification service is unavailable → display the bell icon without a count badge; do not block any other part of the application. - Linked lead or record has been deleted → display the notification but show a message on click: 'This record no longer exists.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				- Management must be able to Mark All as Read. - Management must be able to Dismiss individual notifications or Dismiss All.		
Notifications	Configure Notification Settings	<i>As a management user, I want to control which alerts I receive and configure system-wide alert thresholds so notifications are relevant and timely.</i>	- User is authenticated with a management role. - User navigates to Notification Settings.	- The screen must list all notification types with individual on/off toggles. - Management must be able to set system-wide thresholds: Time limit before a new lead must be contacted (default 24 hours), Days of inactivity before a lead is flagged as dormant (default 7 days), Hours before an inspection that it must be confirmed (default 24 hours). - Management must be able to set their preferred reminder timing for follow-up due alerts (e.g. 1 hour before, 2 hours before, day of). - Changes must apply immediately on save.	Settings are saved and applied immediately. Thresholds affect all future alert evaluations system-wide.	- Admin sets dormancy threshold to 0 days → block and display: 'Threshold must be at least 1 day.' - Save fails → display error with retry; do not apply partial changes.
ROLE: Sales Closer / Relationship Manager						
Module: Authentication						
Login	Email & Password Login	<i>As a Sales Closer or Relationship</i>	User has an active	The Login screen is identical for all roles	User is authenticated	Account is inactive → display: 'Your

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
		<i>Manager, I want to log in securely so I can access my personal dashboard and leads.</i>	account with a Closer or RM role. User is on the Login screen.	(see Management Login spec). - On successful login, a Closer or RM must be redirected to the Sales Closer Dashboard, not the Management Dashboard. - The system must only display leads assigned to this user; leads assigned to other closers must not be visible or accessible.	and lands on the Sales Closer Dashboard. Session is scoped to that user's assigned leads only.	account is inactive. Please contact your administrator.' Credentials are incorrect → display: 'Incorrect email or password. Please try again.'
Module: Sales Closer Dashboard						
Dashboard	Personal Performance Dashboard	<i>As a Sales Closer, I want to see my own leads, follow-ups, and pipeline summary when I log in so I know exactly what to work on today.</i>	- User is authenticated as a Sales Closer or Relationship Manager. - User has been redirected to the Sales Closer Dashboard after login.	- The dashboard must display personal summary cards: My Total Assigned Leads, My Active Leads, My Inspections Booked This Month, My Conversions This Month. - The dashboard must display a 'Follow-Ups Due Today' section listing all leads where the follow-up date is today, sorted by time. Each entry must show: Lead Name, Phone Number, Current Stage, and Follow-Up Time. - The dashboard must display an 'Overdue Follow-Ups' section (above the due-today list) showing all leads	Dashboard renders with the closer's own data only. All counts, lists, and sections are accurate.	- No follow-ups due today → display: 'No follow-ups scheduled for today.' - No overdue items → do not show the Overdue section (or show it with a positive confirmation: 'No overdue follow-ups. Great work!').

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				where the follow-up date has passed. Each entry must show: Lead Name, Phone Number, Stage, and how many days overdue. • Overdue follow-ups must be visually emphasised (e.g. red background or red text). • The dashboard must display a personal pipeline snapshot: count of the closer's leads at each stage. • The dashboard must display 'Upcoming Inspections' showing all inspections assigned to this closer in the next 7 days. • The dashboard must display a recent activity section showing the last 5 activities this closer has logged. • A quick-action button 'Log Activity' must be available on the dashboard to open the Log Activity modal. • A quick-action button 'Add New Lead' must be available.		
Module: Lead Management						
Lead Management	View My Lead List	<i>As a Sales Closer, I want to view only the leads assigned to me so I can</i>	• User is authenticated as a Sales Closer or RM.	• The Lead List must display only leads assigned to the logged-in user. Leads	• Lead list renders with only this closer's	• No leads assigned → display: 'You have no leads assigned to you yet.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
		<i>manage my portfolio without confusion from other closers' leads.</i>	User navigates to My Leads in the sidebar.	assigned to other staff must not appear. - The table must include the same columns as the management Lead List: Lead Name, Phone, Source, Category, Stage, Temperature, Follow-Up Date, Last Activity Date. - The closer must be able to search by lead name or phone. - The closer must be able to filter by: Pipeline Stage, Lead Source, Lead Category, Temperature. - Dormant and overdue follow-up flags must be shown as described in the management Lead List spec. - Clicking a lead row must open the Lead Profile screen. - The closer must be able to Add a New Lead from this screen.	assigned leads. Search, filter, and navigation function correctly.	Closer attempts to access a lead URL that belongs to another closer → display: 'You do not have permission to view this lead.'
Lead Management	Create New Lead	<i>As a Sales Closer, I want to add a new lead I have sourced so it is immediately captured in the CRM and tracked.</i>	- User is authenticated as a Sales Closer or RM. - User clicks 'Add New Lead'.	- The form fields and validation rules are identical to those described in the Management Create Lead spec. - The Assigned Closer field must be pre-filled with the logged-in user's name and must	Lead is created and appears in the closer's Lead List. Assigned closer is set to the logged-in user.	Duplicate phone number detected → display the same warning as described in the management spec and allow the closer to proceed or cancel.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				- not be editable by the closer (only management can assign leads to others). - All other required fields apply: Lead Source, Category, Temperature, Stage, Next Action, Follow-Up Date. - The system must block saving if any required field is empty.		Session timeout before save → display: 'Your session has expired. Please log in again.' Preserve form data where possible.
Lead Management	View Lead Profile	<i>As a Sales Closer, I want to view my lead's full profile and conversation history so I can prepare for my next interaction and pick up from exactly where I or a colleague left off.</i>	- User is authenticated as a Sales Closer or RM. - User has clicked a lead from My Leads or the Follow-Up Queue.	- The Lead Profile for a closer is identical to the management Lead Profile in terms of information displayed. - The closer must be able to Log Activity, Update Pipeline Stage, Set Follow-Up Date, Book Inspection, and Edit Lead Info from this screen. - The closer must NOT be able to Reassign the Lead, Archive the Lead, or Delete the Lead. These actions must not be visible to this role. - The full Activity Log must be visible and readable by the closer regardless of who logged each entry. - The closer must be able to see all linked inspection records for this lead.	Lead profile renders with all relevant information. Closer can take permitted actions. Restricted actions are not visible.	- Closer navigates to a lead that has been reassigned away from them → display: 'This lead has been reassigned and is no longer in your portfolio.' - Profile fails to load → display retry.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
Lead Management	Log Activity / Conversation	<i>As a Sales Closer, I want to log every interaction I have with a lead so the history is complete and any colleague can continue the conversation if needed.</i>	- User is authenticated as a Sales Closer or RM. - User is on the Lead Profile screen and clicks 'Log Activity'.	- The Log Activity modal for a closer is identical in fields and validation to the management Log Activity spec. - The 'Logged by' field must auto-fill with the closer's name and must not be editable. - On save, the activity must appear immediately in the Lead's Activity Log and the dashboard's recent activity section. - On save, the lead's Last Activity Date must be updated.	Activity is saved, visible in the lead's timeline, and the last activity date is updated.	- Closer tries to close the modal without saving → display: 'You have unsaved changes. Are you sure you want to discard them?' - Save fails → display error with retry; preserve form content.
Module: Follow-Up & Reminder Management						
Follow-Up Management	View My Follow-Up Queue	<i>As a Sales Closer, I want to see only my due and overdue follow-ups so I can work through my daily task list efficiently.</i>	- User is authenticated as a Sales Closer or RM. - User navigates to My Follow-Ups in the sidebar.	- The follow-up queue must display only leads assigned to the logged-in closer. - The layout and columns are the same as described in the management Follow-Up Queue spec. - The closer must be able to: click a row to open the Lead Profile, mark a follow-up as Done (which prompts the closer to set the next follow-up date), and Snooze a follow-up (push forward by 1 day, 2 days, or a custom date — requires a reason note).	Queue renders with only the closer's follow-ups. Done and Snooze actions function correctly and are logged.	- Closer marks a follow-up as Done but does not set a new follow-up date → display: 'What is the next follow-up date for this lead?' Block completion until a date is selected or the closer explicitly selects 'No follow-up needed.' - Queue is empty → display: 'You have no follow-ups due. Keep up the good work!'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				- The closer must NOT be able to reassign a follow-up from this screen. - Snoozed follow-ups must be visible to management as snoozed items in their team-wide Follow-Up Queue view.		
Module: Inspection Management						
Inspection Management	Book an Inspection	<i>As a Sales Closer, I want to schedule an inspection for a qualified lead so the visit is formally tracked and the inspection officer is notified.</i>	- User is authenticated as a Sales Closer. - User is on a Lead Profile and clicks 'Book Inspection', OR navigates to Inspections and clicks 'Schedule New Inspection'.	- The Create Inspection form for a closer is identical in fields to the management Create Inspection spec. - The Lead selector must be pre-filled if opened from a Lead Profile. - The Assigned Closer field must be pre-filled with the logged-in user's name and must not be editable by the closer. - The Assigned Inspection Officer dropdown must show all active inspection officers. - All validation rules from the management spec apply: required fields must be completed before saving. - On save, the lead's pipeline stage must update to 'Inspection Booked' if it was	Inspection is created, visible in the Inspection List, and the officer is notified. Lead stage is updated.	- Lead already has an active inspection → display the same warning as described in the management spec. - No inspection officers available in the dropdown (all deactivated) → display: 'No inspection officers are currently available. Please contact your manager.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				previously at a lower stage. • On save, the inspection officer must receive a notification with full booking details.		
Inspection Management	View My Inspection Records	<i>As a Sales Closer, I want to view inspections linked to my leads so I can track their status and follow up appropriately after each visit.</i>	- User is authenticated as a Sales Closer. - User navigates to Inspections in the sidebar.	- The Inspection List must display only inspections where the Assigned Closer is the logged-in user. - The table columns, status colour coding, and filtering options are identical to those in the management Inspection List spec. - The closer must be able to click any row to view the full Inspection Record in read-only mode. - The closer must NOT be able to update the inspection status, submit inspection reports, or upload photos. These actions are reserved for the Inspection Officer role. - The closer must be able to navigate from the Inspection Record to the linked Lead Profile.	Inspection list renders with only the closer's assigned inspections. Record is viewable in read-only mode.	- No inspections → display: 'You have no inspections scheduled or recorded yet.' - Closer attempts to edit an inspection record → the edit controls must not be visible; no action must be possible.
Module: Pipeline Tracker						
Pipeline	View My Pipeline Board	<i>As a Sales Closer, I want to see my leads arranged on a</i>	User is authenticated	The Pipeline Board must display only the	Pipeline board renders with	Drag-and-drop fails → revert card and display: 'Stage could

		<i>pipeline board so I understand where each relationship stands at a glance.</i>	as a Sales Closer or RM. User navigates to Pipeline in the sidebar.	leads assigned to the logged-in closer. - The board structure, column order, card details, and drag-and-drop functionality are identical to the management Pipeline Board spec. - Stage changes made by the closer via drag-and-drop must be automatically logged in the lead's activity timeline. - The closer must be able to click a lead card to open the Lead Profile. - The closer must NOT be able to filter the board by staff member (there is only one — themselves).	only the closer's leads. Drag-and-drop stage changes are saved and logged.	not be updated. Please try again.' No leads in the system yet → display an empty board with stage column headers still visible and a prompt: 'Add your first lead to get started.'
Module: Alerts & Notifications						
Notifications	Receive & View Personal Notifications	<i>As a Sales Closer, I want to receive alerts about my own leads and follow-ups so I never miss an important action.</i>	- User is authenticated as a Sales Closer or RM. - The notification bell is visible in the top navigation on all screens.	- The bell icon, unread badge, panel layout, and read/dismiss behaviours are identical to the management notification spec. - Closer-specific notification types must include: New lead assigned to me, My follow-up is due in [configured time], My follow-up is overdue, My lead has gone	Notifications are delivered for the closer's own leads only. Navigation from notification to record works correctly.	- Notification service unavailable → same degraded handling as management spec. - Linked record has been archived or deleted → same handling as management spec.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				dormant, My inspection is scheduled for tomorrow, New inspection report submitted for my lead, My lead's stage has been changed by management. - Closers must NOT receive team-wide alerts (e.g. alerts about other closers' missed follow-ups). - Clicking a notification must navigate to the relevant lead or inspection record.		
ROLE: Inspection Officer						
Module: Authentication						
Login	Email & Password Login	<i>As an Inspection Officer, I want to log in so I can access my inspection assignments and submit reports.</i>	- User has an active account with the Inspection Officer role. - User is on the Login screen.	- Login screen and behaviour are identical to the standard spec for all roles. - On successful login, the Inspection Officer must be redirected to the Inspection Officer Dashboard.	User is authenticated and lands on the Inspection Officer Dashboard.	- Account inactive → display standard inactive message. - Invalid credentials → display standard error message.
Module: Inspection Officer Dashboard						
Dashboard	Inspection Officer Dashboard	<i>As an Inspection Officer, I want to see all my scheduled inspections and pending tasks when I log in so I can plan</i>	- User is authenticated as an Inspection Officer. - User is redirected to	The dashboard must display a summary row: Today's Inspections (count), This Week's Inspections (count), Pending Confirmation (inspections not yet	Dashboard renders accurately with this officer's assigned	- No inspections today → display: 'No inspections scheduled for today.' - Dashboard data fails to load → display retry.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
		<i>my day and stay organised.</i>	the Inspection Officer Dashboard after login.	confirmed by the client), Completed This Month, No-Shows This Month. - The dashboard must display a 'Today's Inspections' list with full details for each: Lead Name, Estate, Time, Meeting Point, Assigned Closer, Current Status. - The dashboard must display a 'Pending Confirmation' section for inspections scheduled within the next 5 days that have not yet been confirmed. - Each inspection row must have quick-action buttons: Confirm, Mark Completed, Mark No-Show. - A 'This Week' calendar strip must display the week at a glance with inspection counts per day.	inspections only.	
Module: Inspection Management						
Inspection Management	View My Inspection List	<i>As an Inspection Officer, I want to view all inspections assigned to me so I can manage my schedule.</i>	- User is authenticated as an Inspection Officer. - User navigates to Inspections in the sidebar.	- The Inspection List must display only inspections where the Assigned Inspection Officer is the logged-in user. - The table columns and status colour coding are identical to the	List renders with only this officer's assigned inspections.	- No inspections assigned → display: 'You have no inspections assigned to you yet.' - Calendar view fails → fall back to list view.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				management Inspection List spec. - The officer must be able to filter by Status and Date Range. - The officer must be able to toggle between list view and calendar view. - Clicking a row must open the full Inspection Record.		
Inspection Management	Update Inspection Status & Submit Report	<i>As an Inspection Officer, I want to update the status of an inspection and submit a report after the visit so the closer and management have a complete record.</i>	- User is authenticated as an Inspection Officer. - User has opened an Inspection Record.	- The officer must be able to update the Status to: Confirmed, Completed, No-Show, Rescheduled, Cancelled. - When marking as Confirmed, no additional fields are required beyond the status change. - When marking as Completed, the system must prompt the officer to complete: Inspection Report (required free text), Client Feedback (free text), Next Step Recommendation (required free text), and to upload Photos/Videos (optional). - When marking as No-Show, the system must require a note explaining the circumstance.	Status is updated and saved. Report and media are attached to the record. Closer is notified. All changes are logged.	- Marking as Completed without filling the required report fields → block and display inline errors next to each empty required field. - Photo/video upload fails → display: 'Media upload failed. Your report has been saved. Please try uploading the files again.' - Rescheduling without a new date → block and display: 'A new date and time are required to reschedule.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				- When marking as Rescheduled, the system must require: New Date, New Time, and Reason for rescheduling. The previous date must be preserved in the record's rescheduling history. - When marking as Cancelled, a reason is required. - On saving any status update, the assigned closer must receive a notification with the new status and (if completed) a summary of the report. - The officer must NOT be able to edit the core booking details (Lead, Estate, Date originally booked, Assigned Closer). These are read-only for this role.		
Module: Alerts & Notifications						
Notifications	Receive Inspection Notifications	<i>As an Inspection Officer, I want to receive alerts about my upcoming and newly assigned inspections so I am always prepared.</i>	- User is authenticated as an Inspection Officer. - Notification bell is visible in top navigation.	- Bell icon, badge, panel layout, and read/dismiss behaviour are identical to the standard notification spec. - Officer-specific notification types: New inspection assigned to me, Reminder 24 hours before a scheduled inspection, Inspection	Notifications are delivered for this officer's assigned inspections only. Navigation works correctly.	- Notification service unavailable → same degraded handling as standard spec. - Linked inspection cancelled → notification is still delivered informing the officer of the cancellation.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				rescheduled (notified of new date), Inspection cancelled.		
ROLE: Admin / Documentation Officer						
Module: Authentication						
Login	Email & Password Login	<i>As an Admin/Doc Officer, I want to log in so I can access my admin dashboard.</i>	- User has an active account with the Admin/Doc Officer role. - User is on the Login screen.	- Login screen and behaviour are identical to the standard spec for all roles. - On successful login, the Admin/Doc Officer must be redirected to their Admin Dashboard.	User is authenticated and lands on the Admin/Doc Officer Dashboard.	- Account inactive → display standard inactive message. - Invalid credentials → display standard error message.
Module: Admin / Doc Officer Dashboard						
Dashboard	Admin Dashboard	<i>As an Admin/Doc Officer, I want to see an overview of my pending tasks and relevant lead statuses when I log in so I can manage documentation and administrative responsibilities.</i>	- User is authenticated as an Admin/Doc Officer. - User is redirected to the Admin Dashboard after login.	- The dashboard must display summary cards relevant to documentation and admin tasks: Leads at 'Reservation' stage (count), Leads at 'Payment' stage (count), Leads at 'Documentation' stage (count), Leads at 'Allocation' stage (count). - The dashboard must display a list of leads currently at the Documentation or Allocation stage with: Lead Name, Assigned Closer, Current Stage, Last Activity Date.	Dashboard renders with accurate stage counts and relevant lead lists.	- No leads at relevant stages → display empty state per card: 'No leads at this stage currently.' - Dashboard data fails to load → display retry.

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				The dashboard must display a recent activity feed showing the last 5 actions logged on leads the admin officer is tracking.		
Module: Lead Management — Read Only						
Lead Management	View Lead List (Read-Only)	<i>As an Admin/Doc Officer, I want to view leads that have reached the reservation, payment, documentation, or allocation stages so I can coordinate the administrative process.</i>	- User is authenticated as an Admin/Doc Officer. - User navigates to Leads in the sidebar.	- The Admin/Doc Officer must be able to view leads in the Lead List but must NOT be able to create, edit, or delete leads. - The lead list view must be pre-filtered to show only leads at the following stages: Reservation, Payment, Allocation, Documentation, Client/Investor. - The officer must be able to search by lead name. - Clicking a lead row must open the Lead Profile in read-only mode. The officer must be able to view the full activity log and inspection history but must not see any edit, reassign, archive, or delete controls. - The officer must be able to Log an Internal Note on a lead's activity log (using the 'Internal Note' activity type only). This is the	Lead list renders in read-only mode filtered to relevant stages. Internal note logging is available.	- Officer attempts to edit a lead directly via URL manipulation → return a 403 response and display: 'You do not have permission to perform this action.' - No leads at the filtered stages → display: 'No leads currently at these stages.'

Epic / Screen	Feature	User Story	Preconditions	Acceptance Criteria	Postconditions	Error Responses & Edge Cases
				only write action available to this role on a lead.		
Module: Alerts & Notifications						
Notifications	Receive Administrative Notifications	<i>As an Admin/Doc Officer, I want to receive alerts when leads reach stages relevant to my role so I can begin the documentation or allocation process promptly.</i>	• User is authenticated as an Admin/Doc Officer. • Notification bell is visible in top navigation.	• Bell icon, badge, panel layout, and read/dismiss behaviour are identical to the standard notification spec. • Admin/Doc Officer-specific notification types: A lead has moved to the 'Reservation' stage, A lead has moved to the 'Payment' stage, A lead has moved to the 'Allocation' stage, A lead has moved to the 'Documentation' stage.	• Notifications are delivered when leads reach the relevant stages. Navigation opens the lead profile in read-only mode.	• Notification service unavailable → same degraded handling as standard spec. • Lead at notified stage is subsequently archived → notification is still delivered; clicking it displays a note that the lead has been archived.
